

The Midnight Sky; Familiar Notes on the Stars and Planets (Paperback)

By Edwin Dunkin

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1872 Excerpt: .appeared very great. He has noticed on frequent occasions several series of broad bands or waves pass from one end of the continuous spectrum to the other, which apparently confirms the changing colour of the stars, according to the interference theory of M. Arago. On the other hand, M. Respighi, an Italian astronomer, who has also observed the wavy motion from one end of the stellar spectrum to the other, differs in many respects from the conclusions of M. Wolf, and throws some doubt on the accuracy of the theory of Arago. M. Respighi considers that the cause of scintillation arises from real and momentary deviations in the positions of different coloured rays produced by the changing state of the atmosphere, and that when these rays are abstracted from the images of the stars, they would naturally exhibit continual variations in their colour and intensity. He...
