Excerpt: .the rights of the entire body of owners under the project as well as those of the United States. 14. Summary.- (1) This project, both as to the lands and the water supply, lies entirely within the Territory of New Mexico. (2) All of the irrigable land in the project is private land except 2.4 per cent. (3) In general the engineering structures appear to be well designed and well executed, but the board does not believe it to be certain that the devices for handling the silt problem will be successful. (4) At the time the project was started the data as to water supply appear to have been insufficient to warrant the undertaking, and such data are not now sufficient to justify the board in drawing conclusions as to whether or not under normal rainfall conditions there will be sufficient water for the...
