It is also to be observed that the determination of calorific value in the case of the Nelson coal is based upon but a single sample Compared from the standpoint of fixed carbon, and mo: sture the coals of the Pikeville quadrangle are of distinctly higher giade than those of Ohio, Indiana, Illinois, Iowa, Missouri, or western Kentucky. The fixed carbon of those given in the group named Sewanee, foi example, along the Sequatchie Valley, is in general 10 per cent above thai of the run of most coals in Illinois or western Kentucky. The contrast is less obvious in comparing Indiana coals from the same standpoint. If the comparison be extended farther east in the Appalachian trough it...
